Profile

Experienced UI/UX and React Native Developer with a strong background in blending design and technology to create engaging, cross-platform applications. Adept at implementing user-centered design principles to deliver intuitive and functional interfaces. Proficient in React Native, I bridge the gap between design and development, producing visually appealing and high-performance mobile applications. My expertise spans IoT integration, React dashboards, and responsive designs. Passion for crafting seamless user experiences makes me stay updated with the industry trends to deliver innovative, high-quality solutions that resonate with the users. My dedication to the fusion of aesthetics and code ensures delivering impactful and user-friendly software.

Professional Experience

UI/UX and React Native Developer, *HASHh Automations* ⬈   2023 – present
                                                                    Udumalpet, India
- Spearheaded the development of interactive cross-platform applications using React Native and UI/UX design principles.
- Integrated mobile applications with IoT devices, enhancing automation solutions. Developed user-friendly React dashboards, ensuring seamless and intuitive user experiences.
- Collaborated with multi-disciplinary teams to deliver projects aligning with user and business requirements.

UI/UX and React Native Developer, *MENPANI Technology*   2022 – 2023
                                                                    Madurai, India
- Created over 50 cross-platform mobile applications, integrating aesthetic designs with functional usability.
- Championed user-centric design, translating wire-frames and mock-ups to interactive, production-ready apps.
- Conducted rigorous testing and feedback loops, optimizing applications to provide exceptional user experiences.
- Delivered projects within tight deadlines and, hence, always met the client's expectations.

Graphic Designer, *Sonic Metals*   2021 – 2022
                                              Tirupur, India
- Conceptualized and delivered more than 100 influential visual design projects that met branding and marketing goals.
- Proficiently utilised Adobe Creative Suite to deliver engaging graphics for print and digital media.
- Worked closely with stakeholders to develop ideas into impactful designs to increase brand presence and interaction.

Education

Bachelor of Engineering (Mechanical), *Sasurie College of Engineering*   2016 – 2020
                                                                                    Tiruppur, India

Skills

Frontend Development
React Native, React.js, HTML, CSS, JavaScript

Tools & Technologies
Adobe Creative Suite (Photoshop, Illustrator, Premiere Pro), Figma, Sketch**.**

Dashboard Development
Creating user-friendly React dashboards for data visualization**.**

Video Editing
Advanced video production and editing techniques

UI/UX Design
Wireframing, Prototyping, User Research, Interaction Design**.**

IoT Integration
Connecting applications with smart devices for automation solutions**.**

Testing & Optimization
Usability testing, feedback loops, and performance enhancement

Collaboration
Strong teamwork skills, stakeholder communication, and cross-functional collaboration

Projects

FoodMania, *A React Native Zomato Clone*
TastyTrack is an excellent React Native app that mimics the primary functionality of Zomato, which is to look at restaurants, view menus, place orders, and track deliveries. It spotlights the user authentication feature, the real-time order tracking, and an outstanding interface for the most enjoyable meal.

MedCab, *A React Native Ambulance Booking Service*
MedCab: a Swarm base App with Easy Booking of Ambulances is a react native application. Ambulances as like Cabs, you can call by tapping a few times of getting your medical issue resolved. One of the features that MedCab can give real-time tracking. Whats more MedCab can do end-user verification also. But the best thing about the MedCab application is the user-friendly design, so the patient and their relatives can easily access the necessary help during the crisis. It is a software product that is designed and developed for easy use from

Savory Screens, *UI Design for Food Lovers*
'Savory Screens,' a dynamic and engaging UI design for a food app, optimized for both mobile and web platforms. This project includes more than 15 screens, each designed to deliver a great user experience with easy navigation and beautiful visuals. 'Savory Screens' will make the discovery and ordering of food a smooth and enjoyable process.

FreshMart, *Grocery Shopping App UI Design*
Designed and developed a user-friendly and visually appealing UI for a grocery shopping app called 'FreshMart.' The project includes more than 15 screens, optimized for mobile and web platforms, focusing on intuitive navigation and a seamless shopping experience.
